Agape Construction: Designing & Building Homeowners' Dreams

Agape Construction Company began 31 years ago working out of the O'Brien family home before moving to its current location at 435 E. Clinton in Kirkwood. Since then, Agape has grown into a premiere design and build firm.

Agape specializes in total renovations, additions, kitchens, bathrooms, custom built-ins, garages and new homes.

No matter what the clients' stage of life, Agape can help them find a comfortable and affordable solution. They are passionate about making homeowners' dreams come true.

"We provide the perfect blend of architectural design and technical expertise. Our seamless design and build process saves our clients time and money," said Kevin O'Brien, owner of Agape and a licensed engineer.

O'Brien works with a team of 29 talented professionals that

include his wife Amy, who handles HR and marketing.

Award-winning Architect Laurie Smith and her team provide exceptional designs. Once a contract is signed, Interior Designer Edie Rice helps each client through the selections process. The production crew, headed up by longtime employee Patrick Kelly, includes nine journeymen and one master carpenter who specializes in custom built-in bookshelves, banquet booths, etc.

Agape's design team and owners (pictured above) received two 2015 Kirkwood Favorite Building Awards.

These inspired O'Brien to comment: "2015 was our best year ever, thanks to great clients in Kirkwood, Webster Groves, Glendale and the surrounding areas.

We strive to produce well-run jobs on time, on budget, with happy, satisfied customers."

So if you need help with your home, call Agape for a complimentary design consultation.
